

RENCO ELECTRONICS, INC.

"Precisely the best coils and transformers"

Date: November 14, 2017
To: Valued Customers
From: Renco Electronics Inc. – Quality Assurance
Subject: California Proposition 65 Statement

This letter is to advise our customers of California's Proposition 65, also known as the Safe Drinking Water and Toxic Enforcement Act of 1986, and Renco's adherence to it. Proposition 65 was a ballot initiative in November 1986. The Proposition was intended to protect California citizens and the State's drinking water sources from chemicals determined by a state agency to cause cancer, birth defects or other reproductive harm.

Proposition 65 requires that a clear and reasonable warning be provided by a company in the course of doing business, who manufactures, assembles, handles, distributes, store, sells, or transfers a consumer product which he or she knows to contain a chemical known to the state to cause cancer or reproductive toxicity to any person to whom the product is sold or transferred.

Renco Electronics Inc. does not use or add any of the hazardous substances specified in Proposition 65. However, by review of Material Declaration Sheets (MDS) provided by our raw material suppliers, Renco has identified the use of Nickel (CAS: 7440-02-0), or other nickel compounds, in ferrite "cores" and steel products. Nickel is a known human carcinogen and listed in Proposition 65. Renco has reviewed the Material Safety Data Sheets (MSDS) associated with raw materials that contain nickel compounds. The MSDS indicate these materials are **not harmful** to touch or handle, specifically when in a solid form, as used and supplied by Renco. The materials can become hazardous if transformed into powder or dust, which Renco and material suppliers never recommend.

At this point in time, the use of nickel is necessary for functionality of certain raw materials. Renco will take proper precautions and comply with Proposition 65 by providing a warning label on packages shipped to customers stationed in California. Procedures will be implemented on or before December 31st, 2017.

The list of chemicals in Proposition 65 is dynamic and ever-changing. Renco will continue to monitor it and update warning labels as needed. Further inquiries can be sent to quality@rencousa.com
