

RENCO ELECTRONICS, INC.

"Precisely the best coils and transformers"

RoHS and REACH-201 Compliance Statement

July, 2019

The need for hazardous substance restrictions in electronic components and systems, has been increased in our industry for many years. As of July 1st, 2006 Renco Electronics, Inc. converted all products to RoHS compliant; Lead-free manufacturing, unless otherwise required by the below exemption. Renco maintains compliance with the current Directive (EU) 2015/863, Amendment of RoHS Directive (2011/65/EU) Annex II; recasting (2002/95/EC), by manufacturing finished components with raw materials that do not exceed the acceptable levels of 10 restricted substances defined by RoHS (EU) 2015/863.

- Tin-Lead (Sn/Pb) solder has been replaced with RoHS compliant Tin-Copper (Sn/Cu) solder. Renco Engineering has incorporated this alternative, due to its performance & compatibility with applications.
- Surface mount components will be compatible with lead-free reflow processes. Thru-hole components will be compatible with lead-free wave soldering processes.

Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18-December-2006, concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH), established a European Chemicals Agency to regulate Substances of Very High Concern (SVHC) and their safe use. Renco Electronics, Inc. manufactures Articles in compliance with REACH and its associated Annex XVII. Renco manufactured Articles, do not intentionally contain or have any added SVHC-201 above the defined threshold of REACH. Articles comply with Annex XVII Restricted Substance List, as applicable by their "Conditions of Restriction". Customers will be notified if any materials do contain SVHC.

Exemption: Renco shall continue to support customer applications that require Tin/Lead (Sn/Pb) solder. To ensure Renco meets this requirement, you must clearly define the use of Sn/Pb solder on your drawing, bill of materials, and/or purchase order. Otherwise Renco defaults to RoHS solder.

Confirmation of the above and other statements made in Renco Electronics, Inc. statutory, regulatory or environmental compliance related documentation, including but not limited to, Certificates of Compliance, Full Material Declarations, and third party test reports, are to the best of our knowledge valid and accurate. Renco communicates material compliance requirements throughout its supply chain and relies upon its suppliers to maintain compliance with such standards and provide accurate information.

Travis W. Rensing
Quality Assurance & Compliance Manager
